PROFILE

I'm an MCA student who's super passionate about technology. I have studied computer science and picked up skills in C, Java, and Python along the way. I like solving problems and I'm quick to learn new stuff. I'm really excited to take what I've learned in my classes and apply it to real projects. I'm eager to team up with other tech enthusiasts and dive into cool IT projects.

TECHNICAL SKILLS

C

Java

Python

HTML

CSS

Django (Framework)

MySQL

PROJECTS

SPACE AND TECHNOLOGY E-LEARNING WEBSITE

FEBRUARY 2024-PRESENT

I am currently enrolled at Aditya College of Engineering and Technology, where I have been diligently working on an individual project focused on the development of an e- Learning website dedicated to space and technology. The primary objective of this endeavour is to create a platform that showcases the deep intersection between Master of Computer Applications (MCA) subjects and their practical utilization in the realm of space exploration

BUG TRACKING SYSTEM

OCTOBER 2021-MARCH 2022

The Bug Tracking System represents a pivotal web-based application meticulously crafted to optimize the identification, tracking, and resolution of software bugs within development teams. Conceived and developed collaboratively by a team of five members, it embodies a comprehensive suite of features including user authentication, bug reporting, workflow management, and collaboration tools.
